## 1.0. Introduction

### 1.1. Purpose

*Of this document is a description of the system to be developed and a presentation of The tasks that must be provided by this it meets all the needs of the customer*

### 1.2. Scope of Project

*This system will include a group of suppliers, and the pharmacist will deal with Them to provide the pharmacy with the required items through a purchase Invoice ,so the pharmacist is responsible for knowing the movement of the items, The expiration date ,calculating the profits, and knowing the deficiencies in order to sell The customer through a sales invoice.*

<b>Term</b>	<b>Definition</b>
pharmacist	A person who checks medical prescriptions and their validity,in addition to dispensing prescriptions according to official reports
Sales person	A person who supplies the pharmacy with the required items
Client	The customer who buys the items he needs
Software Requirmonts Specification	This is document for professionally describing requirements
Varieties.	A group of valleys that are sold to the customer under a prescription
Receipt	It is a document that the supplier supplies to the pharmacist ,indicating the types of items and their prices
Bill of sale	It is a document that the customer with the price of the items
Employee	A person who works in the pharmacy and does work that the pharmacist does not do

#### ***1.4. References***

IEEE. *IEEE Std 830-1998 IEEE Recommended Practice for Software Requirements Specifications.*

#### ***1.5. Overview of Document***

The next chapter, is the general description section of this document ,which gives an overview of how the pharmacy system is managed

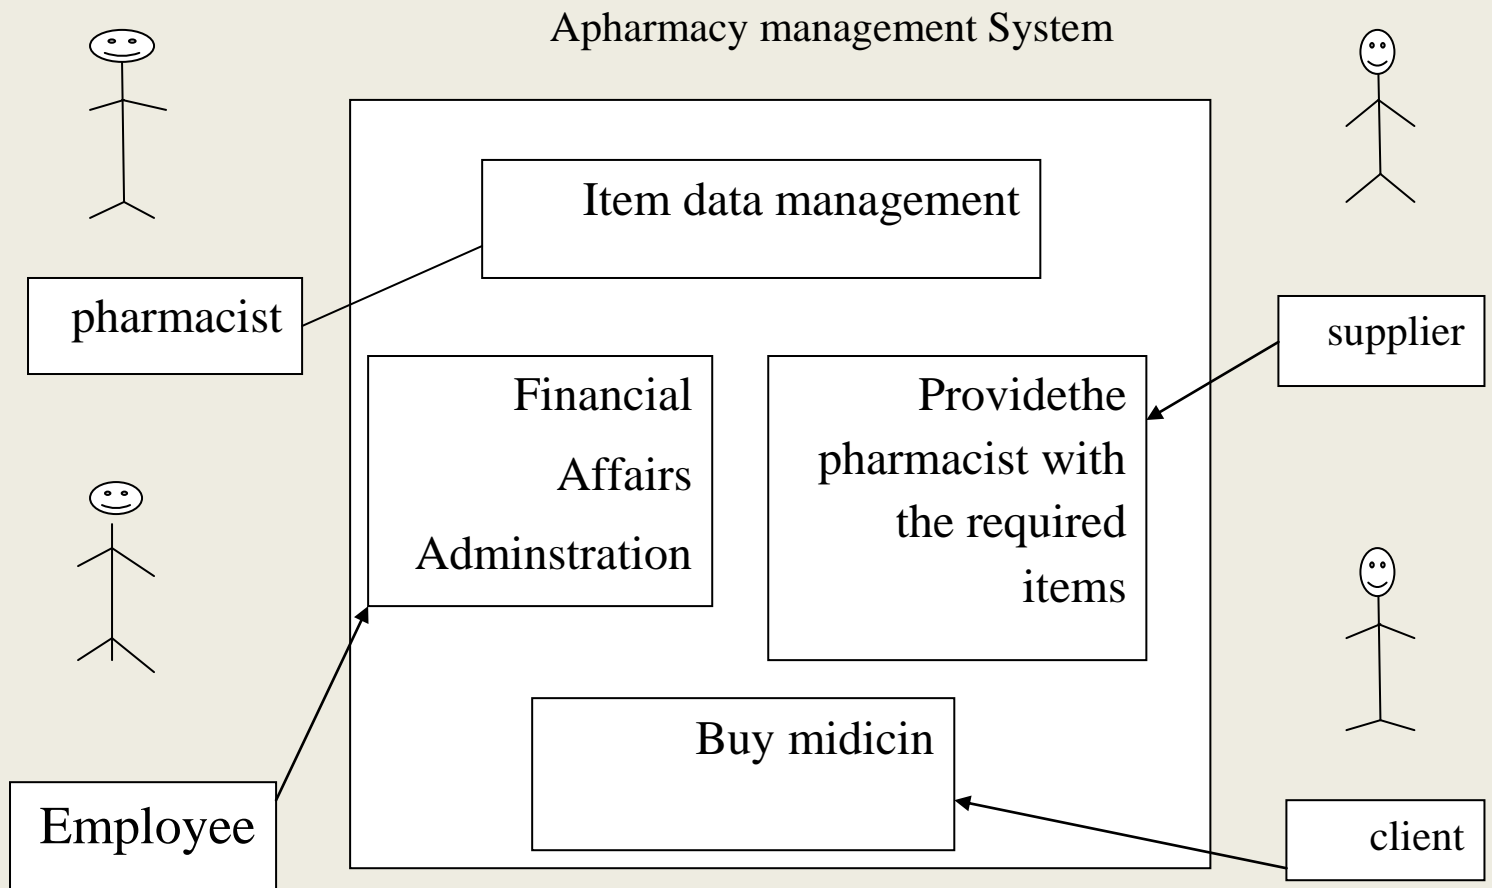

It also describes non\_functional requirements and is also used to create context to describe technical requirements in the next chapter

\*chapter three: the Requirements description section, is detail for this document ,where it

Describes the functional details of the system in technical terms.

## 2.0 over all Description

### 2.1 system Enviroment

The pharmacy system contains three active players(active actors)  
And someone helpful with the system (cooperating system)

## 2.2 Functional Requirements Specification

### 2.2.1 pharmacist sue case

Use case :Medicinal items Diagram

#### Brief Description

The pharmacist obtains the required items from the suppliers

#### Initial Step-By-Step Description

- 1- The pharmacist checks for non-existent or completely sold items
- 2- Then The pharmacist communicates with one of the suppliers
- 3- The supplier supplies the pharmacy with the required items
- 4- The pharmacist enters the items into the database with specifying their price ,production ,date,expiration date ,manufacturer name

**Xref :** Section 3.2.1, medicinal items

### 2.2.2 Author Use Case

Use case

**Brief Description:**

The responsible employee calculates the percentage of profits for pharmacy by making an inventory of the entire pharmacy

1-the employ displays the names of the items

2-then it determines the price at which the items were purchased

3-then it determines the price at which the items were sold

4-when the employee completes the inventory process ,a percentage of profit is obtained

**Xref :** Section 3.2.2,do an inventory of the pharmacy

### **2.2.3 Sales person use case**

**Use case :supplying the pharmacy with the items**

**Digram**

#### **Brife Description:**

**The supplier supplier the pharmacist with the required items**

#### **Initial step-By-Step Description :**

- 1-the supplier is in direct contact with the pharmacist**
- 2-the pharmacist shall present a deficiency report**
- 3-the supplier supplies the pharmacy with the required items through a sales invoice**

**Xref :section 3.2.3,**

### **2.3 User Characteristics**

**\*the pharmacist is expected to be able to use all means of communication to communicate with suppliers and to be able to deal with the computer to Manage items from entry and deletion , item modification , item search**

**\*it is expected that the employee will be able to use an accounting software  
To be able do an inventory of pharmacy**

### **2.4 Non Functional Requirements**

**1-on the system or on a network infrastructure**

**2-the system must have its services available for 12 hours**

### 3.0 Requirement Specification

#### 3.1 External Interface Requirments

**There is only one external communication  
With the system from the customer**

### 3.2 Functional Requirements

#### 3.2.1 Request items

Request items Section 2.2.1, Request items SDD, Section 7.1	<b>Use Case Name</b> <b>XRef</b>
The pharmacist will order the items	<b>Trigger</b>
1. The pharmacist displays a deficiency report 2. The pharmacist communicates with one of suppliers 3. the suppliers fulfills the request through a bill of sale 4. The pharmacist introduces the items	<b>Basic Path</b>

#### 3.2.2 Do an inventory of the pharmacy

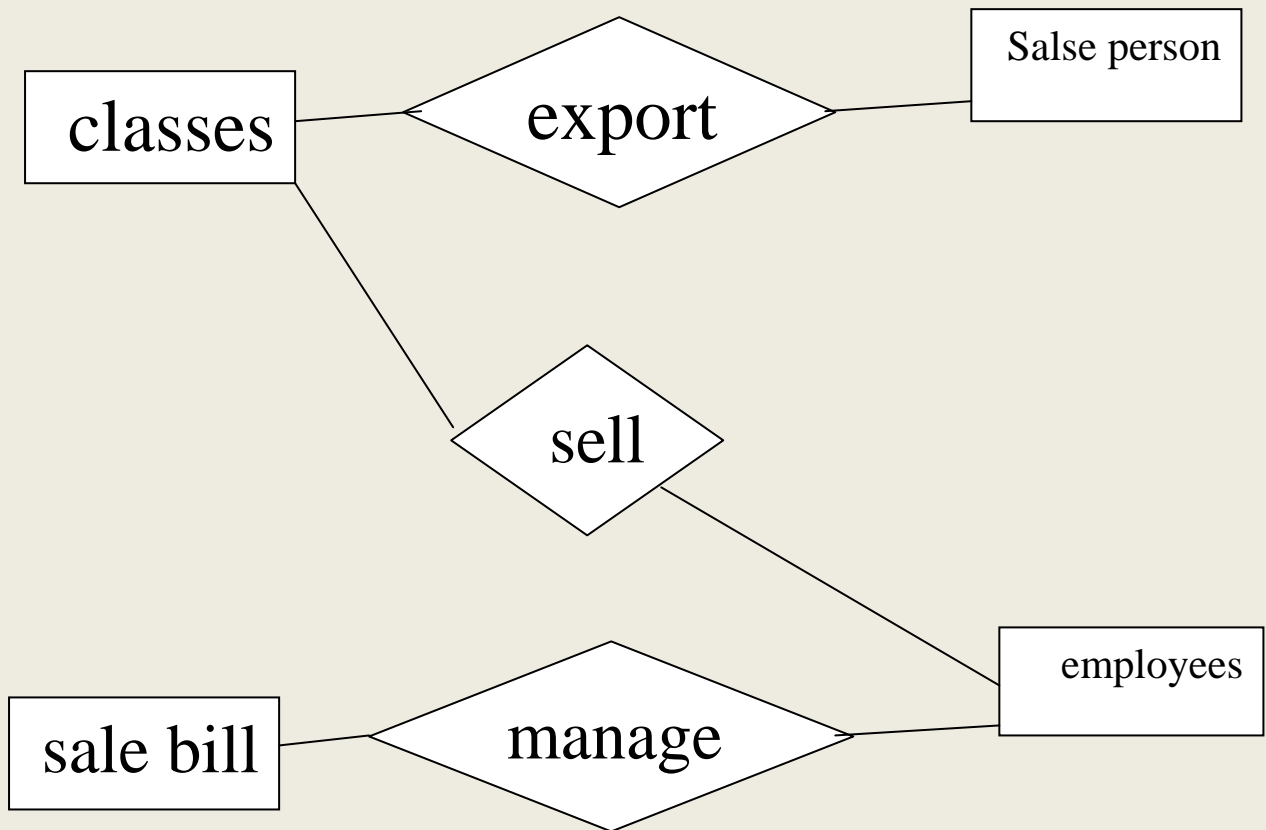

Do an in ventory of the pharmacy Section 2.2.2, Do an in ventory of the pharmacy SDD, Section 7.2	<b>Use Case Name</b> <b>XRef</b>
The responsible employee makes an inventory of the pharmacy to calculate profits	<b>Trigger</b>
1-the employee displays the names of the items in the pharmacy 2-then he determines the purchase price 3- then he determines price at which to sell 4-after completing the inventory,he calculates the percentage of profits	<b>Basic Path</b>

### 3.2.3 Supplying the pharmacy with items

Supplying the pharmacy with items Section 2.2.3, supplying the pharmacy with items SDD, Section 7.3	<b>Use Case Name</b> <b>XRef</b>
The supplies the supplies the pharmacy with the required items	<b>Trigger</b>
1-The supplier contacts the pharmacist	<b>Basic</b>
2-the pharmacist determines the items that the pharmacy needs	
3- The supplier fulfills the request from a sales invoice	

### 3.3 Detailed Non-Functional requirements

#### 3.3.1 Logical Structure of the Date

**The data descriptions of each of these data entities is as follows:**  
**Classes Data Entity:**

Data Item	Type	Description	Comment
Name	nvarchar	Name of classes	*****
Number	Integer	Number of classes	*****
Quantity	Integer	Quantity of classes	*****
Price	Integer	Price of classes	*****
Mfg date	date	Mfg date of classes	*****
Exp date	date	Exp date of classes	*****

**Sales person Entity:**

Data Item	Type	Description	Comment
Name	nvarchar	Name of the sales person	***
Number	Integer	Number of the sales person	***
Phone	varchar	Phone of the sales person	May be several

**Employees Data Entity:**

Data Item	Type	Description	Comment
Name	nvarchar	Name of the employee	*****
Number	Integer	Number of the employee	*****
age	Integer	Age of the employee	*****
Work hours	Integer	Number of the employees work hours	*****
salary	Integer	salary of the employee	*****

**Sale bill Data Entity:**

<b>Data Item</b>	<b>Type</b>	<b>Description</b>	<b>Comment</b>
pharmacy Name	nvarchar	pharmacy Name of the sale medicine	****
Order number	Integer	Sell bill's Order number	****
Class name	Integer	Sold out class name	****
price	nvarchar	Sold out class price	****
quantity	Integer	Class's quantity	****
sum	Integer	The total price	****
Receiving date	date	Bill's receiving date	****

### **3.3.2**

**The system must achieve a high degree of privacy as it only available to Persons authorized to access it by entering a password**
